

Combining Cotton Decorating with **ChromaBlast™** and Sublimation Printing with **SubliJet®**

THE ONLY ALL-IN-ONE SYSTEM ON THE MARKET

What is ChromaBlast?

ChromaBlast™ is Sawgrass' unique patented ink and media combination driven by powerful print software to create the best cotton imaging system available. As heat and pressure is applied to the cotton, a chemical cross-link with cotton occurs. The result is a customized cotton shirt with soft hand, vibrant color and superior washability.

What is SubliJet?

SubliJet® is Sawgrass' signature sublimation ink that creates vibrant, highly-customized images on demand from an inkjet printer. When sublimation inks are heated to 400 degrees F, they turn into a gas and form a permanent bond to 100% polyester fabric, or items that have a polymer coating. The image that remains, is a full-color, high-quality, photographic image and will not crack, peel or wash away from items such as banners, t-shirts, and flags and non-wearables like mugs, mousepads, plaques, and tiles!

HOW THE HYBRID DUAL DECORATING SYSTEM WORKS

- 1 Choose a Material to digitally decorate with the **Hybrid** system, this could include polyester-coated materials or cotton fabrics.
- 2 Create or import your artwork using a standard graphic program.

- 3 Choose either PowerDriver or the ChromaBlast driver through the Print command to manage your color output.

- 4 Insert the correct media for your ink and print the image using either SubliJet inks for sublimation printing or ChromaBlast inks for cotton decorating.

- 5 Using a standard heat press, fuse your image onto your substrate.

- 6 Present a totally customized, full-color decorated product to your customers!

**The ONLY
All-In-One System
on the Market!**

TECHNICAL SPECIFICATIONS

Printer Platform	Epson 4800
Paper Sizes	SubliJet: 17x22, 11x17, 8.5x11 ChromaBlast: 8.5x11, 11x17

MINIMUM SYSTEM REQUIREMENTS FOR EPSON 4800

- Pentium 4, 2.8GHz, 512MB RAM
- Windows 2000 with Service Pack 4

RECOMMENDED SYSTEM SET UP FOR EPSON 4800

- Pentium 4, 3.0GHz, 1GB RAM
- Windows XP

Introducing

HYBRID

DUAL DECORATING SYSTEM

The Sawgrass Hybrid System offers the ultimate in flexibility and production in digital printing. Featuring Sawgrass' patented SubliJet and ChromaBlast inks, the Hybrid system allows for printing on both polyester and cotton surfaces. The possibilities from one machine are truly endless! This all-in-one system produces vivid images that your customers will love – and profits that you will appreciate.

More than just ink

Sawgrass offers the total solution with the Hybrid system. Integral elements of the system, PowerDriver and the ChromaBlast driver allow for color management control and ensure that output is on target. Sawgrass also commits its premier customer support that ensures your satisfaction with the Hybrid system. Around the clock, we're your partner in your business' success.

Why choose the Hybrid System?

- **It's all-in-one system!** No need to buy various printers – the Hybrid handles it all for Polys and Cottons.
- **It's simple!** With the click of a mouse, you are on your way to producing customized, digital images on the fly.
- **It's reliable!** Proven printer technology and Sawgrass quality inks combine for great results print after print.
- **It's mobile!** Eliminate extra baggage when you take one machine that can do it all to your customers!
- **It's affordable!** One machine with multiple functionalities equals lower start up costs

Want to Convert?

Hybrid Conversion Kits are available to current SubliJet and ChromaBlast customers that wish to quickly and easily convert their systems to a Hybrid system.

ORDER YOUR HYBRID SYSTEM TODAY!

The Sawgrass Hybrid system is available through Sawgrass' Authorized Network of Channel Partners. To order your system today, contact us at **886.290.3812** or visit our website at www.sawgrassink.com.
