

ACCUFAST®

The ACCUFAST 6FV

The ACCUFAST 6FV is, as its name implies 6 feet long. It is sold only as a free standing unit that can be rolled up to many different mailing machines. The 6FV has a single wide belt and can be used straight on or at right angles to its input device.

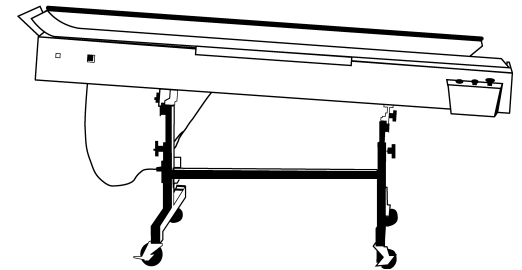

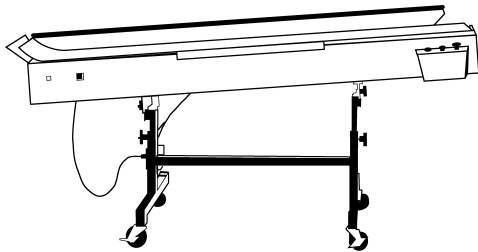

The ACCUFAST 6FV Conveyor

Operators can set the 6FV to match their height to insure their comfort and relieve repetitive stress. Each end adjusts independently of the other. They can also mount the controls (power switch, system “Kill” switch and speed control) at any of the four corners of the conveyor. This allows the 6FV conveyor to be set up and customized to the piece of equipment that it is handling in the room where it is located for the people who are running it on any given job on any given day.

The 6FV is commonly used to provide drying time for the output of high speed ink jets such as the ACCUFAST P6.

ACCUFAST 6FV

- weighs 140 pounds
- footprint measures 75"l X 21"w x 29-36"h; transport length is 6'
- uses 115 volts 2 amps 60hz or 230 volts 1 amp 50 hz
